STABLECOIN POLICY · REGULATORY TRANSLATION · FEDERAL COMMENT LETTERS

8 federal comment letters · 8 SSRN papers · industry dialogues (Treasury, Nasdaq, NYSE, DTCC, Swift, JPM Kinexys, Securitize)

SUMMARY

Stablecoin policy strategist and regulatory translator. Authored eight federal regulatory comment letters in 2026 across OCC bank stablecoin engagement, Treasury GENIUS Act state similarity, FDIC payment-stablecoin reserve standards and subsidiary-issuance approvals, FinCEN AML/CFT and PPSI sanctions, and joint banking AML/CFT. Founding research hire at Borderless Capital (RIA, Dec 2019 to Feb 2026), translating GENIUS, CLARITY, Singapore MAS, MiCA, and state money-transmitter / trust-charter regimes into product, reserve, routing, and compliance decisions across U.S., Singapore, Cayman / BVI / Bermuda, and EU. Engaged in working-level dialogues on stablecoin and tokenization deployment with major capital-markets infrastructure (Nasdaq, NYSE, DTCC, Swift), tokenization platforms (Securitize, JPM Kinexys), and U.S. Treasury (national security research). Now founder of Tokenization Systems (Feb 2026 to present); published the MVEP institutional diligence framework and CLII gateway concentration index. Predicted Thorchain's \$200M insolvency 13 months ahead; sourced the LayerZero seed (~80x) at Borderless.

EXPERIENCE

Founder · Tokenization Systems

Feb 2026 – Present

- Contributed eight comment letters across a federal regulatory program (OCC bank stablecoin engagement [RIN 1557-AF41](#) plus [supplemental control-layer extension](#); Treasury GENIUS Act state similarity; FDIC payment-stablecoin reserve standards [RIN 3064-AG19](#) and stablecoin-subsidary issuance approvals [RIN 3064-AG20](#); FinCEN AML/CFT [FINCEN-2026-0034](#); FinCEN-OFAC PPSI sanctions [FINCEN-2026-0100](#); joint banking AML/CFT [91 FR 18304](#); [Routing the Dollar](#) submitted to the Federal Reserve Fifth Conference on the Dollar's International Roles (Jun 2026); [Governance Concentration](#) in peer review at Frontiers in Blockchain.
- Authored an eight-paper SSRN-live research program covering the **Control Layer Intensity Index** (CLII) for gateway concentration, the **Minimum Viable Equivalence Pack** (MVEP) for institutional tokenization diligence, programmable monetary-policy design ([Adaptive Tokenomics](#)), governance concentration, and operational risk in token economies.
- Capital-markets infrastructure dialogues with Circle and Ubyx on stablecoin and deposit-token deployment.

Senior Investment Analyst, Digital Assets · Borderless Capital (RIA; first hire)

Dec 2019 – Feb 2026

- Translated regulatory change (GENIUS, CLARITY, Singapore MAS, MiCA, state money-transmitter and trust-charter regimes) into product, reserve, routing, and compliance decisions across U.S., Singapore, Cayman / BVI / Bermuda, and EU; coordinated cross-functional partner work spanning Product / Engineering, Risk (operational-risk taxonomy), and Legal.
- Engaged in working-level dialogues with major capital-markets infrastructure (Nasdaq, NYSE, DTCC, Swift), tokenization platforms (Securitize, JPM Kinexys), and U.S. Treasury (national-security research staff) on stablecoin and tokenization deployment paths.
- Mapped jurisdictional tax / regulatory advantages of DAT structures over direct crypto holding: Japan's Metaplanet DAT cuts crypto capital-gains tax from up to 55% to 20% (equity rate, further reducible via Japan's IRA structure); Hong Kong's Southbound Connect could give mainland Chinese capital regulated access to crypto banned domestically.
- Predicted Thorchain's **\$200M insolvency 13 months in advance**; Borderless held no exposure when the predicted failure mode materialized.
- Advised 100 portfolio companies 1-on-1 on token mechanism design (stablecoin reserves, governance-token allocation and incentive design, yield wrappers, burn/emission dynamics); standards defined in [Introduction to Tokenomics](#).
- Built quantitative token-economic models forecasting emissions, fee capture, subsidy-to-revenue trajectories, and governance concentration under wide scenario ranges; supply-equilibrium and slashing dynamics supporting Layer 1 mechanism-design advisory.
- Led discovery and diligence across a 1,000+ deal investment funnel (pre-seed to Series C); shipped 250 portfolio investments at ~25% deployment rate across ~10 institutional funds (~\$500M AUM), with build/partner/hold recommendations to committee.
- Built automated SEC-filing and press-release monitoring for Digital Asset Treasury Stocks (DATs); analyzed ~75 tokenization offerings in 2025 and invested in 18; AI-assisted diligence workflows reducing subscription-document review from ~4 hours to ~1 hour per deal.
- Built the firm's research function from scratch; led a four-analyst team producing ~25 long-form publications annually; taught 100 teams across nine accelerator programs (2021 to 2025).

SELECTED RESEARCH

- [Minimum Viable Equivalence Pack](#). Ten-category institutional diligence standard; finds bank-chartered stablecoin issuers face ~22x the regulatory capital requirements of money-transmitter-chartered issuers at \$40B scale.
- [Routing the Dollar](#). Submitted to Federal Reserve / FRBNY Fifth Conference on the Dollar's International Roles (Jun 2026). Gateway concentration; CLII across 19 gateways including Visa Direct-adjacent paths.
- [Seven Dollars](#). Cross-product framework for major dollar-denominated digital products; CLII / MVEP decoupling; stress propagation through dependency chains (SVB, Circle pool, Paxos).
- [Three Tokenization Strategies](#). Each of three strategies satisfies different MVEP categories with measurably different strength (Regulated Collateral Circuit, Multi-Issuer Yield Stack, Tokenized Equity Rails); Securitize as cross-strategy concentration risk.
- [Operational Risk in Token Economies](#). Operational-risk taxonomy (74 risk vectors, 64 testable controls, 31 program objectives) mapped to a 624-scenario battery; Lido V3 staking-vault case study.
- [Adaptive Tokenomics](#). Industrial control engineering (PID controller) applied to token-supply emission as programmable monetary-policy mechanism; 240-scenario Monte Carlo simulation; cuts worst-case supply volatility ~6x under competitor-shock attack.
- [Governance Concentration Beyond Token Allocation](#). In peer review at Frontiers in Blockchain. 40-protocol cross-section: initial token allocation does not predict governance concentration; protocol sector does (DePIN significantly more concentrated than DeFi; Cohen's $d = 0.96$).
- [Who Burns the Tokens?](#) Burn-mechanism design (carrier contracts vs. subscriptions) drives demand concentration: Helium's carrier-contract model concentrates ~90% of token burns in 5 purchasers (HHI 0.22) despite ~1M hotspots; coalition-power analysis extends standard concentration measures for single-address risk.

TECHNICAL

Methods: policy-shock impact estimation (difference-in-differences), Monte Carlo simulation, PID controller design (industrial control engineering), coalition-power analysis, supply equilibrium modeling, build-versus-partner framework design

Data: Dune Analytics, Nansen Pro, Artemis, DefiLlama, CoinGecko, Helius (Solana), Spacescope, Blockscout, Token Terminal; automated SEC filing and press release monitoring + data extraction

Stack: Python (pandas, statsmodels, scipy, matplotlib), R (fixest, did, synthdid), SQL (DuneSQL, Trino), JavaScript / TypeScript; 14 custom Python MCP servers (FRED, DefiLlama, CoinGecko, Helius, Blockscout, Tally, Dune, Spacescope, Nansen, GitHub) for real-time feeds; Claude.ai + Claude Code + Cursor with 36-skill library and 17-file living-knowledge architecture; n8n, Apify, Git / GitHub

RECOGNITION

- Uniswap Foundation governance committee (2024)
- ETHDenver pitch judge
- [Introduction to Tokenomics](#) article publicly endorsed by Binance founder CZ on day of publication

EDUCATION

High Point University | B.S.B.A., Business Administration (Magna Cum Laude) · Investment Club President
Lingnan University, Hong Kong (Exchange)
